To Members of East York Community Council

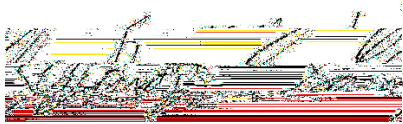

RAvenue between Pape Avenue and Broadview Avenue.

The area is a busy public route, with a high concentration of schools from both communities around the travel to and from area. We have a high level of support for improved traffic safety measures in the area and community safety. We have a high level of support for increased safety measures on Pape near Mortimer, particularly during the pre- and construction work that are now underway.

I am particularly supportive of the recommendation for a Community Safety Zone at the intersection of Pape and Wood and along that would enhance student safety during the construction in the area.

Thank you very much for your letter and for your community perspective.

Sincerely,

Councillor Paul Sturges

Board 15 Toronto - Danforth
