To whom it may concern:

Re: Support for Learn On at BCG Eastview

I am writing today to offer my support for the Learn On program at BCG Eastview, which has been funded by Employment & Social Development Canada under the Supports for Student Learning Program.

This program has offered free school supports for youth who face barriers in the community I represent as an elected school board trustee.

BGC Eastview has built community trust and relationships over the years including with area school communities so as to effectively identify and deliver programming to those students who need it most. The program is a stable and important avenue for these young people and provides them an important avenue outside of the school system to make the connections and develop the skills they need to persist in completing their studies.

I have had the opportunity to see first-hand how important and needed the Learn On programming is in our community. And I am hopeful that this program will continue to be financially supported to be able to continue and expand its impact.

Please don't hesitate to reach out to me if you would like to further discuss how the Learn On program is positively impacting youth who face systemic barriers in our community.

Please take care,

Sara Ehrhardt

Trustee, Toronto District School Board Ward 15, Toronto-Danforth
